LIFELONG RESEARCH OBJECTIVE

My lifelong research objective is to build AI systems that people can use with confidence and trust. As AI becomes an increasingly important part of everyday life, I aim to ensure that its capabilities, limitations, and behaviors can be reliably understood and evaluated. Through research on model interpretability and trustworthy evaluation, I hope to contribute to a future where people can benefit from AI while clearly understanding when and why its outputs can be trusted.

RESEARCH INTERESTS

My research interests center on understanding and improving Large Language Models (LLMs) through interpretability and evaluation. I am particularly interested in analyzing how linguistic, task-related, and capability-related information is represented within model internals, and in using these insights to better explain model behaviors, limitations, and failure modes. At the same time, I aim to develop more reliable and meaningful evaluation methodologies that go beyond surface-level benchmark scores by examining robustness, validity, generalization, and the extent to which benchmarks truly reflect the capabilities they are intended to measure. Ultimately, I seek to connect interpretability with evaluation so that a deeper understanding of model representations can inform the design of more trustworthy, transparent, and practically useful LLM systems.

EDUCATION

- **Soongsil University** Feb. 2021 - Present
B.S student School of Computer Science & Engineering (advisor: Chanjun Park)
GPA: 4.14/4.5

WORK EXPERIENCES

- **Natural Language Processing Lab, Soongsil University** Nov. 2025 - Present

PUBLICATIONS

Research Projects

Soongsil University

- 2026년 인공지능 말뚝 운영 및 연계 행사 개최 (2026, 참여연구자 (용역과제), National Institute of the Korean Language)
- 2026년 인공지능의 한국어 능력 표준 평가 과제 구축 및 활용 (2026, 참여연구자 (용역과제), National Institute of the Korean Language)
- 우수연구 신진연구 (유형B) (2026-2029, 참여연구자 (3책5공), NRF)
- Foundation Model 운용과정에서 민감정보 추론 방지 및 리스크 평가 기술 개발 (2026-2028, 참여연구자 (3책5공), Korea Internet & Security Agency (한국인터넷진흥원))
- 토론과 소통으로 지식을 연결하는 AI 에이전트 기술 개발 (2026-2028, 참여연구자(PM) (3책5공), Korea Creative Content Agency(한국콘텐츠진흥원))
- AI 보안 특화 'AI 에이전트' 개발 선행 연구 (2026, 참여연구자 (용역과제), 한국정보보호학회 산하 AI보안연구회)
- 국가·공공기관 가이드라인 준수를 위한 AI 시스템 보안 위협 자동화 기술점검 도구 개발 (2026, 참여연구자, KIST)
- AI 연구용 컴퓨팅 지원 프로젝트 (파라미터 수준의 정보 제어 원천기술 연구 및 파라미터 스튜디오 플랫폼 개발) (2026, 참여연구자, KETI)

AWARDS/FELLOWSHIPS/RESEARCH GRANTS

Awards

Fellowships

- Baekma Academic Excellence Scholarship (Full Tuition), Soongsil University (Mar. 2025)
- Baekma Academic Excellence Scholarship (Full Tuition), Soongsil University (Sep. 2021)

Research Grants

- VESSL AI GPU Grant Program (2026)

PATENTS

Domestic Patent Applications

- **Method and Apparatus for Determining Functional Requirements of User Queries Using Pre-Generation Hidden States of a Large Language Model**
대규모 언어 모델의 생성 전 은닉 상태를 이용한 사용자 질의의 기능적 요구사항 판단 방법 및 장치
Chanjun Park, Kyojun Choo
Korean Patent Application, filed on August 19, 2026 (Application No. 10-2026-0156645).
